Post-Event Summary Report

22 – 24 AUGUST 2019 **GMM Live House at CentralWorld**

Objectives

- To foster network and partnership on smart city development
- To adopt the ASCN TOR and MNE Framework
- To share knowledge, experience, and best practices in smart city development

Expected Results

- Adoption of ASCN TOR
- Adoption of ASCN MNE Framework
- Way forward to smart city development in ASEAN

Rationale

ASEAN Smart Cities Network (ASCN) was established by the ASEAN Member States (AMS) at the 32nd ASEAN Summit in April 2018 as a cooperative platform towards the common goal of smart and sustainable urban development through digital technology and innovation. The ASCN aims to synergize development efforts, share best practices, catalyze opportunities for sustainable development, and build capacity. The ASCN meeting was inaugurated by Singapore in 2018 and was planned to meet annually to discuss progress on each city's action plan, launch new projects, and explore new opportunities with ASEAN's external partners.

As Thailand is the ASEAN Chair in 2019, Thailand hosted the ASCN roundtable meeting and conference during 6-7 June 2019, where ASCN members met to update the process of their smart city development and start discussing ASCN Terms of Reference (TOR) as well as Monitoring and Evaluation (MNE) Framework.

In this regard, Thailand is delighted to host the ASCN Annual Meeting during 22-24 August 2019, which is the part of ASCN Conference and Exhibition 2019. The event will showcase ASCN smart cities and continue to serve as a forum for exchange of information and best practices, seek synergistic collaboration on smart city development, as well as concluding ASCN TOR and MNE Framework which will be noted at the 35th ASEAN Summit in November 2019.

ASEAN THAILAND 2019 ADVANCING PARTNERSHIP FOR SUSTAINABILITY
